Requisition Description

Engagement Type:	Contract
Short Description:	11-15 years of experience. Provides analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements to provide an integrated IT solution.
Complete Description:	The Department of Health requires an Integration Specialist with a strong background in System Engineering process and methodologies. We are building a system that will integrate a combination of live data-sources and flat-file data sources into a back-end system. Data formats will need to be translated as well as transformations on the data will have to be performed. The successful candidate will be familiar with a variety of integration tools and processes. The successful candidate will also have an understanding of how to assemble larger processes from individual systems. • Responsible for assuring the integrity of the various data sources. • Validating the data sources • Installing and configuring integration connectors and brokers as needed • Translating any data formats • Utilizing current/server environments as integration platforms • Setting-up any mechanisms for flat file integration --- CONTRACT JOB DESCRIPTION Responsibilities: 1. Provides analysis related to the design, development, and integration of hardware, software, man-machine interfaces and all system level requirements to provide an integrated IT solution. 2. Develops integrated system test requirement, strategies, devices and systems. 3. Directs overall system level testing. Minimum Education/Certification Requirements: Bachelor's degree in Information Technology or related field or equivalent experience
