Real-time hands-free inventory that adapts to your needs.

Flexible, reliable shelf reader systems that are easy to install and maintain

The SmartShelf™ is an item level tracking solution for shelf or put-away locations, equally suited for work-in-progress, warehouse parts management and retail/commissary merchandising applications.

SmartShelf™ was developed to provide real-time inventory management, and can be integrated as a component of a larger inventory management system. Using years of experience in creative antenna design, RFIDGS fits the antennas to the shelf to provide item-level visibility that meets our customers' needs, whether the items are small, large and bulky, or if slot visibility is required. Shelving can be made from a variety of materials, including wood, PVC, high-density polyethylene, or metal.

RFIDGS can provide a SmartShelf™ solution allowing effective management of all your on-shelf inventory.

The SmartShelf™ can be adapted to meet unique customer requirements. is highly adaptable and may be used with any RFID manufacturer's equipment. Light indicators and other sensing devices may be easily attached.

SmartShelf™ for Retail

SmartShelf™ for Manufacturing.
