CAPABILITY STATEMENT

INTRODUCTION

SupreTech is a Certified Small Disadvantaged Business founded in 2003 with headquarters in Washington, DC. SupreTech provides enterprise systems engineering and integration solutions to both the State and the Federal Government. Our mission is to provide our customers with the best solution to meet their requirements within their budget and on schedule.

SupreTech has sustained consistent growth by providing the government with a trusted partner who can satisfy the unique needs of an Agency.

The SupreTech Management Team has a long and respected history of successful performance on client projects. They are also familiar with the many government acquisition programs and procedures. SupreTech President/CEO has acquired many years of experience as a Network Engineer through his prior federal government careers. SupreTech employees average 15 years plus experience with many holding advanced degrees and multiple certifications in technical and management specialties. SupreTech can easily assist an Agency with their technical mission to meet their desired results within their budget limitations.

CAPABILITIES AND EXPERTISE

Application Development - We develop application Life Circle from initial design and analysis to first stage implementation to completion. Our project solutions team includes on-site project managers and web developers with high level of technical expertise in areas such as Database Management, Web and E-commerce development, Application Deployment, Desktop Application, Client/Server applications.

Asset Tagging and Document Management - We implement Document Management such as: workflow, eforms, document imaging, document archiving, record and Information management offerings bring order to the volumes of unorganized papers, computer files, images, email and all other types of unstructured data. Eliminate the barriers that exist between agency staff and their technology. We deploy asset tagging to inventory.

Cloud Technology - Consider accessing agency network anytime, anywhere and anyhow. This technology helps agencies to enjoy accessibility, flexibility, reliability and mobility. SupreTech cloud integration solutions leverage our deep integration technology and expertise to enable higher levels of reliability, cost-effectiveness and security throughout your integration project.

Network Infrastructure - We offer technology services ranging from small to medium LAN/WAN Networks to helpdesk support. We have qualified engineers that handle the followings: emails, hardware and software support, project management, analysis, implementation, design, wireless mobility, public safety, security, RFID, data centers, copiers, printers, scanners, and faxes.

Technology Hardware and Software Sales
We have reseller agreements from over 30 manufacturers to resell technology hardware and software.

Virtualization with VMware Technology - We reduce the number of servers agencies have to buy and System Administrators would not have to support but instead concentrate on more strategic administrative tasks. SupreTech will create self-contained applications in isolated environments. Each self-contained environment reflects the underlying operating system. This solution creates great Return of Investment (ROI).
