**Company Overview**

SupreTech Incorporated is a premier Information Technology company specialized in Custom Application Design Services and the Sale and Services of all IT Hardware and Software.

Our company provides strategic technology and business solutions to the Federal, State Governments, commercial, small business and non-profit customers. We provide the highest quality yet well rounded solutions tailored to specific clientele needs by applying the expertise provided by our interdisciplinary staff.

Our mission is to provide you with the best solution to the user requirements within budget and on schedule .Our management team have a long and respected history of successful performance on client projects. Supretech, Inc. was established in March, 2004, with headquarters in Washington, DC.

Our management team possesses a long and respected history of successful performance on client projects. We are committed to providing client satisfaction, innovative IT solutions, and adding value to client operations.

**Industry-Wide Problem**

Computers, software and application development are essential assets of businesses. As agencies grow and diversify, the number of computers and related products increase creating massive complexities in their maintenance and management. Most firms are tasked with ensuring security and proper configuration of their equipments. Even after spending huge sums of money, companies can find themselves with inefficient solutions to their IT needs. This can result in even higher cost and more risks against security threats, often with limited warning.

Therefore, there is a pressing need for each agency to find IT solutions tailored to their needs and their budget.

**Distinguishing Characteristics**

- Four main characteristics distinguish SupreTech from competition namely;
- Diverse and Integrated solutions teams
  - Custom-designed IT solutions for each client
  - Plan-Administer-Control-Adjust (PACA) project management model
  - Unique client relationships

---

SupreTech renders services to Information Environments of varied sizes. The diversity of our client base prompts us to utilize emerging and innovative technologies to deliver state-of-the art solutions. Our specialized and highly trained interdisciplinary team enables us to quickly create high quality solutions that integrate several fields of Information Technology. The result is solutions that are far-reaching, spanning the complete range of computing needs, but unique and specific to a client's needs.

Our company has initiated a project management model Plan-Administer-Control-Adjust (PACA) which has proven successful.

One of the company's strengths is our approach to client relationships. We engage with our clients as business partners. We have a deep commitment to developing and nurturing long term relationships with our clients. Thus we are geared towards long term profitability and not a quick exit after completion of a project.

### Value Added

SupreTech takes into consideration the cost and time associated with superior IT solutions. Therefore we create flexible solutions that are quick to develop, robust and highly scalable. For our customers, this means a decreased upfront cost and a much longer lifespan for the developed solution.

Finally, given the vast number of services, customers are placed with the option to use one company to cater to all their IT needs, rather than dealing with several companies simultaneously.

### Executive Profile

#### Ignatius Ogu

CEO, Founder

Mr. Ogu brings over 20 years of strong business and technology experience in network and system administration, design, implementation, diagnostics, user support and training. He has vast experience in IT infrastructure and enterprise systems in a large corporate multi-site environment. He also has senior level experience in management of IT teams, operations management, mass deployments, risk management, and technical documentation. Mr. Ogu leads the effort in developing and executing all technology related projects and brings years of full cycle software development, project management, executive and consulting experience to the firm
